

ReConvales® Cardio

Feed supplement for cats and small dogs

Supplements the diet with taurine, carnitine and omega 3 fatty acids

Taurine is an essential amino sulphonic acid that must be consumed in sufficient quantities, especially for a well-functioning heart.

Omega 3 fatty acids are high-quality lipids with numerous important functions. Since they cannot be produced by the body, they have to be consumed with the food.

L-carnitine plays an important role in energy metabolism.

Hawthorn provides valuable secondary plant substances.

ReConvales® Cardio supplements the diet with a high concentration of taurine and L-carnitine, as well as omega 3 fatty acids and hawthorn. In addition, **ReConvales® Cardio** provides moisture, vitamins and trace elements and is extremely tasty.

Composition:

Oils and fats, meat and animal by-products, vegetable by-products (hawthorn 1%), sugar, minerals

Analytical components:

Crude protein	3.5%	Crude fat	4.5%
Crude fibre	0.7%	Crude ash	1.3%
